> [REDACTED] (1400-1600) - I have arranged Gavin Clark of Thompson & Clark Security Specialists to present to all crew on situational security awareness. This covers activist's tactics and how to manage an encounter with activists and involves a presentation and scenario based exercises.

- >  
> The objectives of the training session include;
- > \* Understanding the threat towards NIWA and identify known activist groups, their principles and methodology
  - > \* Understanding of conflict and negotiation, conflict cycle and dealing with difficult situations
  - > \* Understand the company communication policy
  - > \* Trespass situations
  - > \* Role plays and awareness tests
  - > \* Certificate of achievement for training records

> I'm aware that that is a fair chunk of time out of the crew's day but it is important and we'll just have to make it work. We've delayed sailing until the [REDACTED] so if demob doesn't get completed we'll get it cleared on the [REDACTED] or [REDACTED].

- >
- > If you could pass onto the crew the information on the security awareness session that would be great.
- >
- > Thanks [REDACTED], regards, [REDACTED]
