Hmmm, she certainly has it in for NIWA. We're out there to investigate the seabed changes post the earthquake to help us understand what is happening.

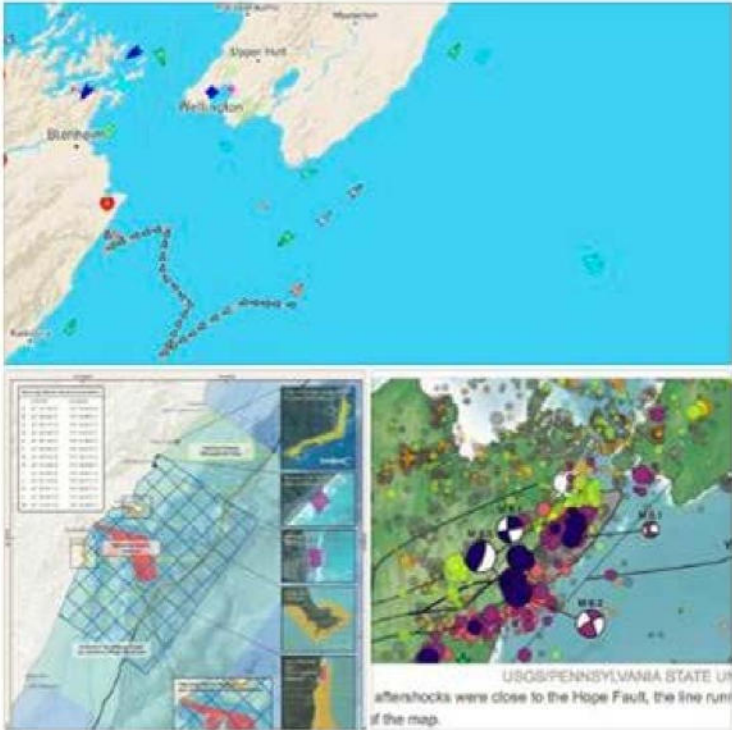

Cheers, [REDACTED]

Come in RV Tangaroa ~ what the frack do you think you're doing seismic blasting right next door to the Kaikoura Whale Sanctuary on the day the first whale has been sighted since the quakes?
Give the whales a break ~ heaven knows they've had more than enough seismic action lately.

USGS/PENNSYLVANIA STATE UN
aftershocks were close to the Hope Fault, the line run
if the map.
