

Meet the Q Team

Barnaby, Chelsie, Tess & Paora
are coming soon to TV One

QTV is on the way. This dynamic new multimedia series explores real-world science issues – presented for kids by kids. QTV takes science out of the classroom and goes wherever real scientists are working, whether it's underwater with spider crabs, on the edge of a volcano, or brewing bugs in the lab.

NIWA is proud to be a sponsor of this 13-part television series. You'll see our scientists in stories about climate change, tsunami, and marine biodiversity.

Don't miss the first episode:

Wednesday, 21 September, 3.30 pm on TV One
